The most cost-effective green cleaners on the planet!

Why Use Conserve® Cleaning Tablets?

- Most cost effective green cleaning option on the market today
- More cost effective than most national brand conventional cleaners
- 1 Bottle + 4 Tablets makes 1 gallon. Just add water!
- Saves three bottles from landfills
- Buy bulk without the bulk: uses 75% less storage space
- No water: weighs 80% less than other liquid products, saving on transportation costs
- Exciting Nature Fresh fragrances

JUST ADD WATER!

1 Tablet + Water = 32 oz.

Use Less

With our bulk packaging, every bottle purchased keeps 3 other bottles from being purchased and ending up in a landfill. Each bottle purchased saves 96 ounces of water – weighing in at whopping 7.5lbs – from being transported resulting in lower shipping costs, not to mention less water used in production. We use only chemicals that are approved by the EPA as “Designed For the Environment”. This makes our cleaners less harmful to the planet, yet still powerful and effective.

Smart Ideas to Save the Environment

The secret to our cleaners’ effectiveness is simple: we’ve removed what isn’t necessary (water) and left in all the good stuff (cleaning power). Each tablet is packed with powerful surfactants formulated to be as effective as the national brand. To use, just drop a tablet in to the bottle, fill with warm water, and start cleaning. The unique tablet is designed to dissolve completely in just a few minutes.

Creating an Experience

Everything about our cleaners is designed to enliven the senses. The packaging, the colors of the cleaners once they are mixed with water, even the scents themselves, craft a sense of health and doing good with consumers.

The Most Cost Effective Green Cleaning Products

Our cleaners are the most cost effective green cleaners on the market today. Compared to Method®, Green Works® and Seventh Generation®, Conserve® has a much better price. We’re giving you a way to offer your customers the ability to use fewer resources without sacrifice. Eighty percent of consumers want to “go green”. Now they can at a price they can afford, and it is less than the national brand.

Item Number	Description	Packed	Retail Price	Your Price
